

Stationary Engine Display Building

Our members have been hard at work this summer organizing the Stationary Engine Display Building Project. We are so thankful to Harold Dueck of H&S Estate Sheds and his crew for doing a great job getting this building up. Thanks to Brost Aggregate & Equipment Inc. for the groundwork, packing clay and making the building foundation. Also, thanks to Giles Contracting Ltd. for the cement work.

Even though the building is up, we still have a lot of work to do! Our next step is to finish construction work, Brost will finish the landscaping and lights will soon be put in the building. Keeping our fingers crossed to start to move stationary engines before the snow comes.

We are so grateful for the opportunity to build this exhibit from the Community Facility Enhancement Program (CFEP) grant.
